Art Unit: 2625

DETAILED ACTION

1. Applicant's response to the election/restriction requirement has been acknowledged. Claim 33 is elected with respect to Species I. Claims 1-32 are not elected.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 3. Claim 33 is rejected under 35 U.S.C. 102(a) as being anticipated by Owa et al. (US Patent Number 6,348,971 B2).

Regarding claim 33:

As shown in figure 1, Owa et al. disclose a printer management server (3, figure 1) that is connected to a plurality of printers (2a-2d, figure 1) through a network (4, figure 1), divides print data into a plurality of print jobs and stores the print jobs (column 8, lines 17-23; note that the generated print data which is also divided into print page and get stored in the management table), wherein:

said printer management server:

Art Unit: 2625

identifies one of said print jobs to be printed (column 8, lines 23-25; note that the printer selection means selects the appropriate printer based upon user information);

provides said distributed print start notification to all or some of said plurality of printers (column 8, lines 30-38; note that when a document print command is entered, the user information selection means selects the appropriate printer for the specified print data);

selects from among printers that have issued an acquisition request for said print job a printer that is appropriate for said print job on the basis of printing capabilities (column 8, lines 39-44; note that the appropriate printer gets selected amongst other printers based on the capabilities i.e. color or monochrome) and status information of the printers (column 8, lines 39-58; note that the printer gets selected based on the status or state); and

assigns said print job to said printer (column 8, lines 46-48; note that based on the selection the print page is converted into print data so that its it printed at an appropriate printer).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ferlitsch et al. (US Publication Number 2002/0089687 A1) discloses a method and system for print-processor-based printer status detection and print task distribution.

Art Unit: 2625

Leiman et al. (US Patent Number 6,469,796 B1) disclose a method for open systems printing including routing print jobs automatically from different types of source computers to different types of printers without the source computers selecting printers for each print job.

Wanda et al. (US Patent Number 7,061,635 B1) discloses a requested print job is divided and distributed to a plurality of printer to efficiently and correctly print data of the print job.

5. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Hilina Kassa whose telephone number is (571) 270-1676.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Moore could be reached at (571) 272- 7437. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about PAIR system, see http://pari-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO
